Electrical Power & Energy Systems

Index to Volume 18 1996

Number 1 pp 1–72
Number 2 pp 73–142
Number 3 pp 143–202
Number 4 pp 203–270
Number 5 pp 271–338
Number 6 pp 339–404
Number 7 pp 405–482
Number 8 pp 483–556

Author Index

Abur, A. 469
Alvarado, F. L. 405
Ananthapadmanabha, T. 27
Annakkage, U. D. 475

Bansilal 461
Bellhouse, G. M. 501
Beune, R. J. L. 207
Billinton, R. 143
Bloom, J. A. 33
Bompard, E. 385
Bos, M. F. J. 207
Bose, A. 425
Brittig, K. 339

Cañizares, C. A. 405
Carpaneto, E. 385
Castro, C. A. 425
Cauley, G. 3
Chakrabarti, B. B. 121
Chakravarthy, S. K. 483
Chang, W. H. 431
Chen, C. S. 431
Chen, H.-C. 453
Chen, J. K. 431
Chen, J.-F. 453
Chen, X. R. 475
Chiang, H.-D. 111, 331
Chicco, G. 385
Chikhani, A. Y. 185
Choi, M.-S. 239
Chowdhury, B. H. 271
Connelly, J. 359

Dai Hongwei 353
Dash, P. K. 55
David, A. K. 223
Debs, A. S. 377

Ejebe, G. C. 3
El-Arabaty, A. M. 415
El-Hawary, M. E. 415
El-Nagar, K. M. 415
Elangovan, S. 55

Fahd, G. 339
Ferrero, R. W. 251
Fukurozaki-Coppinger, S. 339
Fukuyama, Y. 111, 331

Gbeddy, F. 143
Ge Shaoyun 353
Ghosh, S. 271
Golob, R. 377
Gopala Rao, A. S. 27

Zitouni, S. 37

Keyword Index

A.C. load flow
Sensitivity analysis, Transient stability analysis 37
Accelerating power
Electrical power, Power system stability 47
Adaptive control
Excitation control, Nonlinear systems 397
Adaptive pre-filter
Security analysis, Contingency selection 425
Alarm handling
Fault diagnosis, Modular neural networks 99
Angle stability
Bifurcation, Voltage stability 493

Back propagation
Contingency ranking, Severity index 271
Bifurcation
Voltage stability, Angle stability 493
Bifurcations
Power system dynamics, Power system stability 279
Bulk systems
System dynamics, Emergency control 161

Capacity outage
Unit addition algorithm (UA), Fast Fourier transform method (FFT) 203
Coarse-grained parallelism
Power systems, Distributed computing 527
Cogeneration plant dynamics
LQG/LTR, Natural frequency oscillation analysis 239
Cogeneration
Transient stability, Load shedding 431
Combinatorial optimization
Parallel genetic algorithm, Service restoration 111
Composite system adequacy
Interconnections, Power wheeling 143
Computer control
HVDC, System identification 223
Computer simulation
Variable structure systems, Sliding mode control 55
Contingency ranking
Severity index, Back propagation 271
Contingency selection
Adaptive pre-filter, Security analysis 425
Control centre design
Utility application, Scheduling 195
Controlled series compensator
Damping control, Power system stability 475

Damping control
Power system stability, Controlled series compensator 475
Damping torque
Static VAr compensator, Phillips-Heffron model 307
Decentralized stabilizers
Variable structure control, Switching plane 535
Decision support software
Power generation, Electricity trading 359
Deregulation
Power systems operation, Economic dispatch 251
Distributed computing
Coarse-grained parallelism, Power systems 527
Distribution automation
Parallel processing 331
Distribution expansion
Mathematical programming, Expansion planning 353
Distribution networks
Real-time, Reactive power control 185
Distribution planning
Heuristic algorithms, Substation planning 315
Distribution protection
Distribution systems, Power quality 323
Distribution system planning
Geographic information system, Minimal-path algorithm 175
Distribution systems
Mathematical programming, Utility application 469
Distribution systems
Power quality, Distribution protection 323
Dynamic stability
Short-term system dynamics 297
Dynamic stability
System identification, Short-term system dynamics 509
Dynamic stability
Transient stability, On-line control strategies 131
Dynamical system
QP oscillation, Frequency locking 483

Economic dispatch
Deregulation, Power systems operation 251
Eigenvalue analysis
HVDC, Voltage stability 11
Eigenvalue analysis
Short-term system dynamics, Voltage stability 445
Electric industries
Variance of production costs, Probability 229
Electrical power
Power system stability, Accelerating power 47
Electricity trading
Decision support software, Power generation 359
Emergency control
Bulk systems, System dynamics 161

Emissions simulation
Power generation, Gaseous emissions 501
Excitation control
Nonlinear systems, Adaptive control 397
Excitation control systems
Generator dynamic models, Stability 139
Expansion planning
Distribution expansion, Mathematical programming 353

Fast Fourier transform method (FFT)
Capacity outage, Unit addition algorithm (UA) 203
Fault diagnosis
Modular neural networks, Alarm handling 99
Frequency locking
Dynamical system, QP oscillation 483
Fuzzy logic
Learning algorithm, Short term load forecasting 215

Gaseous emissions
Emissions simulation, Power generation 501
Generation system reliability
Load duration curve, Production costing 33
Generation system reliability
Production costing, Peak load forecast uncertainty 153
Generator dynamic models
Stability, Excitation control systems 139
Generator scheduling
Unit commitment, Genetic algorithm 19
Genetic algorithm
Generator scheduling, Unit commitment 19
Genetic algorithm
Scheduling, Unit commitment 339
Geographic information system
Minimal-path algorithm, Distribution system planning 175
Grey dynamic model
Power system, Load forecasting 409

Heat storage control
Unit commitment, Lagrangian relaxation 207
Heuristic algorithms
Substation planning, Distribution planning 315
HVDC
System identification, Computer control 223
HVDC
Voltage stability, Eigenvalue analysis 11

Industrial power system
Parallel processing, Transient simulation 437
Inertia
Subsynchronous resonance, Series compensation 371
Interconnections
Power wheeling, Composite system adequacy 143

KB system
Simulated annealing 27

L-index
Least squares minimization, Voltage stability 461
Lagrangian relaxation
Heat storage control, Unit commitment 207
Learning algorithm
Short term load forecasting, Fuzzy logic 215
Least squares minimization
Voltage stability, L-index 461
Load duration curve
Production costing, Generation system reliability 33
Load flow
Network analysis, Security assessment 377
Load flow
Parallel processing, Power system 453
Load flow
Voltage stability, Power system bifurcations 385
Load forecasting
Grey dynamic model, Power system 409
Load shedding
Cogeneration, Transient stability 431
Load shedding
Power system optimization 415
Loadflow
Network analysis, Security assessment 121
LQG/LTR
Natural frequency oscillation analysis, Cogeneration plant dynamics 239

Mathematical programming
Expansion planning, Distribution expansion 353
Mathematical programming
Scheduling, On-line control 167
Mathematical programming
Utility application, Distribution systems 469
Meter
Negative phase sequence, Relay 547
Minimal-path algorithm
Distribution system planning, Geographic information system 175
Modeling of power systems
State estimation, Security assessment 73
Modular neural networks
Alarm handling, Fault diagnosis 99
Multi-area
Reliability indices, Production costing 259

Natural frequency oscillation analysis
Cogeneration plant dynamics, LQG/LTR 239
Negative phase sequence
Relay, Meter 547
Network analysis
Security assessment, Load flow 377
Network analysis
Security assessment, Loadflow 121
Nonlinear control
Variable structure control, Robust control 519
Nonlinear systems
Adaptive control, Excitation control 397
Numeric computation
Power system transients, Symbolic computation 405

On-line control
Mathematical programming, Scheduling 167
On-line control strategies
Dynamic stability, Transient stability 131

Parallel genetic algorithm
Service restoration, Combinatorial optimization 111
Parallel processing
Distribution automation 331
Parallel processing
Power system, Load flow 453
Parallel processing
Transient simulation, Industrial power system 437
Peak load forecast uncertainty
Generation system reliability, Production costing 153
Phillips-Heffron model
Damping torque, Static VAr compensator 307
Power generation
Electricity trading, Decision support software 359
Power generation
Gaseous emissions, Emissions simulation 501
Power quality
Distribution protection, Distribution systems 323
Power system bifurcations
Load flow, Voltage stability 385
Power system dynamics
Power system stability, Bifurcations 279
Power system
Load flow, Parallel processing 453
Power system
Load forecasting, Grey dynamic model 409
Power system optimization
Load shedding 415
Power system stability
Accelerating power, Electrical power 47
Power system stability
Bifurcations, Power system dynamics 279

Power system stability
Controlled series compensator, Damping control 475
Power system stability
Transient energy function 65
Power system transients
Symbolic computation, Numeric computation 405
Power systems
Distributed computing, Coarse-grained parallelism 527
Power systems operation
Economic dispatch, Deregulation 251
Power wheeling
Composite system adequacy, Interconnections 143
Probability
Electric industries, Variance of production costs 229
Production costing
Generation system reliability, Load duration curve 33
Production costing
Multi-area, Reliability indices 259
Production costing
Peak load forecast uncertainty, Generation system reliability 153

QP oscillation
Frequency locking, Dynamical system 483

Reactive power control
Distribution networks, Real-time 185
Real-time
Reactive power control, Distribution networks 185
Relay
Meter, Negative phase sequence 547
Reliability indices
Production costing, Multi-area 259
Robust control
Nonlinear control, Variable structure control 519

Scheduling
Control centre design, Utility application 195
Scheduling
On-line control, Mathematical programming 167
Scheduling
Unit commitment, Genetic algorithm 339
Security analysis
Contingency selection, Adaptive pre-filter 425
Security assessment
Load flow, Network analysis 377
Security assessment
Loadflow, Network analysis 121
Security assessment
Modeling of power systems, State estimation 73
Security assessment
Short-term system dynamics, Transient stability 347
Sensitivity analysis
Transient stability analysis, A.C. load flow 37
Series compensation
Inertia, Subsynchronous resonance 371
Service restoration
Combinatorial optimization, Parallel genetic algorithm 111
Severity index
Back propagation, Contingency ranking 271
Short term load forecasting
Fuzzy logic, Learning algorithm 215
Short-term system dynamics
Dynamic stability 297
Short-term system dynamics
Dynamic stability, System identification 509
Short-term system dynamics
Transient stability, Security assessment 347
Short-term system dynamics
Voltage stability, Eigenvalue analysis 445
Simulated annealing
KB system 27
Sliding mode control
Computer simulation, Variable structure systems 55
Stability
Excitation control systems, Generator dynamic models 139
State estimation
Security assessment, Modeling of power systems 73
Static VAr compensator
Phillips-Heffron model, Damping torque 307
Structure-preserving
Transient stability, Transient energy function 3
Substation planning
Distribution planning, Heuristic algorithms 315
Subsynchronous resonance
Series compensation, Inertia 371
Switching plane
Decentralized stabilizers, Variable structure control 535
Symbolic computation
Numeric computation, Power system transients 405
System dynamics
Emergency control, Bulk systems 161
System identification
Computer control, HVDC 223
System identification
Short-term system dynamics, Dynamic stability 509

Tap locking
Voltage stability, Voltage control 81
Transient energy function
Power system stability 65
Transient energy function
Structure-preserving, Transient stability 3
Transient simulation
Industrial power system, Parallel processing 437
Transient stability analysis
A.C. load flow, Sensitivity analysis 37
Transient stability
Load shedding, Cogeneration 431
Transient stability
On-line control strategies, Dynamic stability 131
Transient stability
Security assessment, Short-term system dynamics 347
Transient stability
Transient energy function, Structure-preserving 3

Unit addition algorithm (UA)
Fast Fourier transform method (FFT), Capacity outage 203
Unit commitment
Genetic algorithm, Generator scheduling 19
Unit commitment
Genetic algorithm, Scheduling 339
Unit commitment
Lagrangian relaxation, Heat storage control 207
Utility application
Distribution systems, Mathematical programming 469
Utility application
Scheduling, Control centre design 195

Variable structure control
Robust control, Nonlinear control 519
Variable structure control
Switching plane, Decentralized stabilizers 535
Variable structure systems
Sliding mode control, Computer simulation 55
Variance of production costs
Probability, Electric industries 229
Voltage control
Tap locking, Voltage stability 81
Voltage stability
Angle stability, Bifurcation 493
Voltage stability
Eigenvalue analysis, HVDC 11
Voltage stability
Eigenvalue analysis, Short-term system dynamics 445
Voltage stability
L-index, Least squares minimization 461
Voltage stability
Power system bifurcations, Load flow 385
Voltage stability
Voltage control, Tap locking 81
